Summany

Thanks for choosing this wireless calling system. The receiver host adopts RF wireless and learning code technology. It can easily pair up to 999 channels of wireless calling transmitters and 1 manager remote controller. The receiver host uses advanced industrial micro processor and high-sensitivity superheterodyne receiving technology which make the products very stable.

At same time, the wireless calling receiver host has advanced number speaker function, it can clearly read the number, function, room number and so on and compatibly for different working mode, suitable for different places.

The wireless calling system has millions of different code which can be paired easily and freely. And it is widely used in restaurant, café, bar, tea shop, KTV, bank, office, factory, hotel, hospital and so on.

Features

- Adopt the latest industrial stable chipset.
- Independent storage avoiding data lost
- Memory 20 calling records history
- 7 prompt voice selectable
- Calling number speaker and time whole point speaker
- Multiple working mode optional for different places
- Self testing technology makes it working well every time
- Super error correction
- Address data only avoiding repeat
- Menu settings voice prompt, easy to set
- Calling records display can be fixed or cycle
- Calling records cycle display time is adjustable
- Adjustable volume
- Restore the factory default function
- High receive sensitivity
- LED tube display, easy to read
- Beautiful designing and portable to move

Technical Data

- Working frequency: 433.92MHz/315MHz
- Working voltage: DC9V/2A
- Standby current: ≤ 130mA
- Working current: ≤ 550mA
- Sensitivity: ≤ 105dBm
- Dimension: 320x157x39mm
### Button Function & Installation to the wall

Note: According to the transmitter type, select the key mode (--6) first, then select the suitable working mode (-10) and prompt voice (--5), at last pair the transmitters.
1. Self test when power on
   When the receiver host is power on, it starts initialization program. The display shows the digits from 000 to 999 along with the prompt sound "Initialization... please wait".

2. Function settings
   At first use, please do the settings like below. After all the settings are finished, please power off the host and reset.
   
   Press "SET" button to enter the first class settings menu. Then press "UP/DOWN" button to select the menu from "-1" to "-11". And press "SET" button to enter submenu.

(1) --1 Pairing call buttons
   Before do the pairing, please turn to "--6" to set key switch setting and "--10" to set the working mode, like general mode or area mode.
   
   Press [SET] button to enter "--1" submenu. The display will show "001", then press "UP/DOWN" to select the number of calling transmitter.
   
   A) General mode paring method
   Press [UP/DOWN] button select one of the number, for example "001", and then press any button on the transmitter, the speaker will sound "successful registration" and the display screen turn to next number "002" automatically. Then you can continue to do the next pairing up to number 999 transmitter (normal mode).
   
   B) Area mode paring method
   In area mode, the first digit of three is the area, it can show !A/b/C/d/E/F! areas, the last two digits means the number from 01 to 99 in one area, press [UP/DOWN] button to select suitable area and number.
   
   C) Pair keypad call button
   In key switch setting, select "005", it is special for keypad mode.
   Turn to "--1" pairing setting, the display shows "001", then press any button on the keypad, the receiver will get it and prompt "pairing successful, please continue." and the display will turn to "002". That means all the 999 codes are paired to the receiver.
   
   Note: the receiver can pair 3 keypad in maximum.

(2) --2: Pair manager controller
   Press [SET] button to enter "--2" submenu. The display will show "001", then press the button on manager controller, the receiver will get it and prompt "pairing successful, please continue." and the display will turn to "002". That means the pairing is finished.
   
   When paird the manager controller, the button [SET/BACK/UP/DOWN] can replace the receiver function button.
   
   Note: the receiver can pair 3 manager controller in maximum. If you pair the fourth one, it will cover the last one.

(3) --3: Delete manager controller
   Press [SET] button to enter "--3" submenu. The display will show "001", press [UP/DOWN] button to select which controller will be deleted+then press [DEL] button to delete- The receiver will prompt !Dingdong! voice which means the deleting is finished.

(4) --4: Delete call buttons
   Press [SET] button to enter " , 4 " submenu. The display will show "001", then press [UP/DOWN] to select the number which will be deleted+then press [DEL] button to delete the call button+the receiver will prompt !Dingdong! voice-
--5: Prompt voice
Press [SET] button to enter "--5" submenu. The display will show "001", then press [UP/DOWN] to select sound prompt mode.
001: No. xx call
002: Floor xx call
003: No. xx come in
004: No. xx treatment
005: No. xx take food
006: No. xx get food
007: Dingdong

--6: key switch mode setting
Press [SET] button to enter "--6" submenu. The display will show "5", then press "UP/DOWN" to just the key mode.
002: 2-key mode, which is suitable for 1/2-button calling transmitters.
004: 4-key mode, which is suitable for 1/3/4/5/6-button calling transmitters.
005: keypad mode

--7: Display cycle time setting
Press [SET] button to enter "--7" submenu. The display will show "000", then press [UP/DOWN] to adjust the display cycle time from "001" to "999" seconds. "000" means no cycle.
This function is that when there are several calling records, they will cycle display one by one automatically.

--8: Auto clear time setting
Press [SET] button to enter "--8" submenu. The display will show "040", then press [UP/DOWN] to adjust the auto delete time from "001" to "999" seconds. "000" means no auto clear function.
This function is that when there is a calling record on the screen, after some time, the record will be cleared automatically.

--9: Volume
Press [SET] button to enter "--9" submenu. The display will show "15", then press [UP/DOWN] to adjust the volume from "01" to "15" different level. "00" means mute.

--10: Working mode setting
Press [SET] button to enter "--10" submenu. The display will show "000", then press [UP/DOWN] to select the working mode.
000: General mode
001: Area mode

--11: Restore the factory default setting
Press [SET] button to enter "Cd10" submenu. The display will show "no", then press [UP/DOWN] to select restore function.
A) All the paired call buttons are deleted.
B) All the paired manager controller are deleted.
C) Prompt voice is "001" mode.
D) Key switch mode is "004" mode.
E) Cycle display time is "000".
F) Auto clear time is "000".
G) Volume is 5.
H) Working mode is general mode.
Select one option and press "SET" button, after 3s the host will restore to default settings and turn back to standby status automatically.
Optional for transmitter

1-button mode: YK500-1E/F, YK1000-1C, YK200-1C, TSYK200-1, YK500-1H
2-button mode: YK1000-2C, TSYK500-2X, YK500-2H, TSYK1000-2X
3-button mode: YK500-3H
4-button mode: YK500-4X, YK500-4H, TSYK1000-4B, TSYK1000-4X, TSYK2000-4X
6-button mode: TSYK500-6
Others mode: TSYK-JP999
