WATCH WIRELESS CALLING RECEIVER

USER MANUAL

Watch wireless calling receiver

I Preface

Thanks for using callingsys watch receiver, it adopts wireless technology, digital identify, TFT screen and high stable IC together to realize time display and wireless calling. The watch uses rechargeable battery and safe charging circuit.

The watch receiver is widely used in restaurants, bars, cafes, hospitals, hotels, and factories and so on.

II Feature

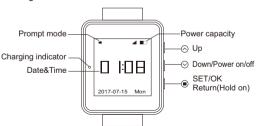

- TFT colorful screen
- RF wireless technology
- · Fashionable watch design
- Fully waterproof
- Up to 999 channels
- Call button data pin support for custom
- Call button words selectable
- Single or list display mode
- Accurate time display
- · Vibration/Buzzer prompt
- · Low-power indication
- Built-in rechargeable battery

III Technical Data

- 1) Working voltage: DC3.7V rechargeable Li-poly battery
- 2) Working frequency: 433.92MHz
- 3) Working current: 57mA±10mA (buzzer mode)
- 95mA±10mA (vibration mode)
- 4) Standby current: <8mA
 - 5) Power-off current: $180 \pm 5 \mu A$
- 6) Receiving sensitivity: -108dBm
- 7) Decoding: learning code
- 8) Modulation: AM

IV Diagram

1. Diagram of function

Press the button 3s to enter settings;

In pairing setting, press the button to change the cursor position; In deleting setting, press the button to delete one paired call button. In calling status, press the button to delete one calling record.

Hold on for return, back to previous menu

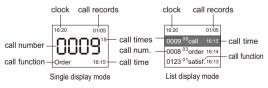

⊗ In pairing/deleting settings, press UP/DOWN to select the number from 0 ~ 9, A ~ Z, - * # □.

in calling status, press the button to browse the calling records.

Press the button 3s to power ON/OFF the receiver;
 Press the button 3s to switch on/off the receiver module;

Note: in standby status, press any button to wake up the screen.

2. Diagram of display

Note: the software may be updated, in different versions, the interface may be little different.

3. Diagram of settings menu

		Button define	Define call button pin function		
	General	Button word	Each button displayed word can be changed

8		***	Other language		
9	Date&Time	16:00	Time		
	Dated Tille	16-01-08 Fri	Date and week		
	Restore	Return	Back to previous menu		
10	default	Restore part	Restore to default except pairing data		
	uciault	Restore all	All will be restored to default		

V Using method

- Wear the watch receiver to the wrist, and put the call buttons in suitable place.
- 2. Press " ⊙ " 1s button to power on.
- Pair the call buttons with the watch receiver. (refer to below instruction)
- When need calling service, press the call buttons, the watch receiver will receive the signal, and display number on the screen with vibration or buzzer prompt.

If customer pressed wrong or no need just called service, press "Cancel" button to cancel the calling service. The calling record will be deleted from the calling records list on the screen.

Note: before calling service, the transmitter should be paired to the receiver according its numbers.

VI Settings

Power on the watch receiver, then the screen turns on and displays the date and time, as well as other information. In standby status, press "SET" button 3 sec to enter settings. The main settings are:

Settings 8/10
Display Order
Auto clear time
Language
Date&Time

1 General

In general settings, set the basic function of the watch receiver. Each call button has one ID number, on the call buttons, there are one or more press buttons, each button has different data pins as below:

	Data pin	D0	D1	D2	D3	D0+D1	D0+D2	D0+D1+D2+D3
	Items	A	В	С	Cenc	D	E	 N
ı	Default	Order	Call	Pay	Cancel	Satisfied	Dissatisfied	 Check

- Button define: this function can change the call button data pins.
 Normally no need change it, if it is changed in error, please restore to factory default.
- 2) Button word: when press the call buttons, the corresponding word will be showed on the watch, like "Call", "Order", "Pay"...as default, but the word can be changed for different occasions. For example, select item A, press [SET] button, there is words list, select one which you want to show.
- Advanced mode: if not open advanced mode, the watch receiver only receive the D0/D1/D2/D3 data.
- 4) Brightness: set screen brightness 1 to 25.
- 5) Prompt time: set vibration or buzzer time from 1 to 10s.
- 6) OSC resistor: support 200-400us and 400-700us call buttons.
- 7) Anti-Malious Call: when call button is pressed very quickly, it only recognize one time.
- 8) Auto off time: Screen auto off time from 1 to 180s.
- 2. Pair buttons
- 1) Pairing call button

In pairing settings, there are 3 pairing mode, "General mode", "999 mode" and "Multi-ID mode"

a) In "General mode", there are 4 digital position, each position can be select from "0~9, A~Z, - * # ___ " characters. You can set any words or letter+digit, like 0001, 56-9, RM33, HELP, A1B2 etc.

Press [SET] button to select the position, then press [UP/DOWN] to adjust the value to select a ID number, then press any button on the call button (transmitter), the watch will receive the wireless signal and record it on this number, the status will turn to "Paired" and jumps to next number automatically.

- b) If no need complicated using environment, please select "999 mode" which ID is number only, from 1 to 999.
- c) In multi-ID mode, each button on the transmitter can be paired as a call button.

3. Delete buttons

There are 3 ways to delete paired call buttons:

 List del button: in this mode, all the paired call buttons are showed in the list, you can select one by one and press [SET] button to delete.

- 2) Search del button: if there are too many paired call buttons, it is hard to select one. In this mode, press the call button, it jumps to the number, then press [SET] button to delete.
- 3) Del all buttons: in this mode, all the paired button will be deleted.

4. Prompt mode

There are 3 prompt modes when there is calling coming.

- 1) Vibration
- 2) Buzzer3) Vibration & Buzzer
- 4) Mute

5. Display Mode

The calling records display has 3 modes.

Single display mode

List display mode

- Single: on each page, it only displays one record, press [UP/DOWN] button to browse others.
- 2) List: all the calling records display in the list, each page displays 3 records. press [UP/DOWN] button to page up/down. If one call button called many times, only one record and calling times are showed

List all: same to "List" function, but if one call button called many times, all records are showed in the list, not show calling times.

6. Display Order

The calling records display has 2 sequences:

- 1) Ascend the latest calling record is shown in the below.
- 2) Descend the latest is calling record shown on the top.

Note: the default is descend order.

7. Auto clear Time

The calling record can be cleared automatically from the calling records list, the time is from 1 to 180s.

Note: the default time is 000, that means no open auto clear function.
