User manual of watch wireless calling receiver

I Preface

The product concentrates the technology of wireless transportation, digital identify, dot matrix LCD display and microprocessor together to realize the functions of time display and wireless calling. The receiver adopts the chipset that contains millions of learning codes, makes the products very safe and stable performance, as well as avoiding wrong calling and incorrect display.

The product uses removable rechargeable battery with long standby time and safe charging circuit.

The fashionable watch design makes it widely used in restaurants, bars, cafes, hospitals, hotels, and factories and so on.

II Feature

Dot matrix LCD screen
Fashionable watch design
Accurate time display
RF wireless technology
Vibration/Buzzer prompt
Low-power indication
Built-in removable rechargeable battery

Used for restaurant, café, hotel, hospital, bank, factory...

III Technical Data

- 1) Working voltage: DC3.7V rechargeable Li-ion battery
- 2) Working frequency: 433.92MHz
- 3) Working current: 57mA±10mA (buzzer mode) 95mA±10mA (vibration mode)
- 4) Standby current: <8mA
- 5) Power-off current: 180 ± 5μA
- 6) Receiving sensitivity: -108dBm
- 7) Decoding: learning code
- 8) Modulation: AM

IV Diagram

1. Diagram of function

Press the button 2 sec to enter settings;

In pairing status, press the button 2 sec to change the cursor position;

In pairing status, press the button to delete one paired call button.

Press the button 1~2 sec to power ON/OFF the receiver;
 In standby status, press the button 2 sec to switch on/off the receiver module:

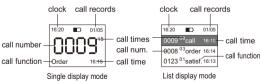

in settings, press the button to back last class menu or quit settings; In calling status, press the button to delete one calling record.

 \odot In pairing/deleting settings, press UP/DOWN to select the number \odot from 0 ~ 9, A ~ Z, :, -

in calling status, press the button to browse the calling records.

Note: in standby status, press any button 2s to wake up the screen.

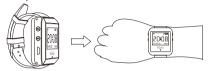

2. Diagram of display

Note: for different software versions, the interface may be different.

Default Set

1. Pair & Delete

1) Pairing call button

Select the "Pair & Delete" then press "SET" button to enter the pairing or deleting settings. The screen shows 0000 as below:

Pair & Delete

OOO

Not paired

Pair & Delete

In the middle of the screen, there are 4 characters position. Press "SET" button 2 sec to change the cursor among the 4 characters. Each character value can be "0, 1, 2, 3, 4, 5, 6, 7, 8, 9, A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z, :, -".

Pres s"UP/DOWN" to adjust the value.

So finally the call button can be a digital number or a word or the combination of them, for example, "0010", "8673", "ROOM", "HELP", "BED7", "10-1", "A-88", "86:1" and so on...

If the number selected is empty, the status shows "Not paired", then press any button on the wireless calling button (transmitter), the watch will receive the wireless signal and record it on this number, the status will turn to "Paired" and jumps to next number automatically.

Note: Each number can be only paired one call button. If press the call button which has been paired, it will jump to the paired number.

2) Deleting call buttons

In the pairing status, select the number which want to delete. The status shows "Paired", then press the "SET" button, it will delete the paired call button and turn to "Not paired".

If want to delete all the paired call buttons, go to "Default set" setting to restore factory default setting, all the paired call buttons can be deleted at one time.

Note: The pair & delete setting is operated by administrator only.

2. Working Mode

Each call button has only one ID (i.e. call number), but the call button may have one or several buttons on it. Each button has its meaning, like "Order", "Call", "Pay", "Cancel" (restaurant mode) etc. In different working occasions, the meanings are different.

There are 7 working modes and the corresponding meanings are:
